Are you already familiar with the technology developments and challenges towards sustainable mobility and you are ready to take a next step deepening or broadening your expertise? Does the idea of alternating between research and consultancy work appeal to you? Then be sure to read on!

WHO WE ARE

At Cenex Nederland it is our mission to support our customers and partners in making the world a better place to live and travel in. As a not-for-profit Consultancy and Research Technology organisation we provide independent expertise for our customers and partners. Our expertise focuses on zero-emission transport, the energy infrastructure it requires as well as adopting the circular economy principles as part of the transition to sustainable mobility.

We are a growing team with complementing specialisms. We believe in fostering a work environment that is supportive and encourages self-initiative and independence. You would join a fun and professional team where sustainability and innovation is considered 'business as usual'! Working hours may vary, but mostly fall between 8.30 (for early birds) and 18:00 (for afternoon thrivers). Whether this is in the office, home, or another (NL/EU) location...or even traveling elsewhere for one of your projects, there is flexibility.

Following the motto 'Alone we can do so little; together we can do so much' we work together with companies and industry networks, knowledge partners, public organisations and governments. The team also often works together with our strategic partner 'Cenex' in the UK, an organisation of over 40 professionals with complementing knowledge and expertise. Amsterdam may be our hometown, but our activities and ambitious agenda have an international reach as we often work in international projects, with customers both in and outside of the Netherlands.

YOUR ROLE

The world of mobility is changing fast Not only is electric and hydrogen becoming part of the transport and energy landscape, but cities and companies are also exploring topics such as vehicle-to-grid, shared

mobility and hubs for transporting goods and people. Should you join the team as our new colleague, you will be providing expertise for research & demonstration projects as well as consultancy projects. Depending on your level of experience, skills and specialisms, your daily activities could vary from:

- Analysing and evaluating (technical, economic, social and environmental) performance of zero-emission vehicles (e.g., BEVs, FCEVs, light- and heavy-duty) and related energy infrastructures (e.g. charging/refuelling)
- Developing zero emission mobility strategies for public and private sector clients (such as local authorities and logistics fleets etc.)
- Evaluating and/or contributing to the development of best practices, policy guidelines and recommendations for sustainable mobility
- Engaging with and maintain relations with clients and partners (industry parties, public sector, knowledge institutes, etc)
- Attending and presenting at conferences and organising workshops
- Writing of customer and public-facing reports and other forms of publications

YOUR PROFILE

The role of 'Specialist & Consultant – 'Zero-Emission Mobility' with Cenex NL can cover a range of specialisms at different experience levels. Do the following personal qualities and skills match with you:

- Relevant master's degree (such as Technology, Engineering, Business and Innovation)
- Expertise and experience in zero or low-emission transport, vehicles and/or related energy infrastructures
- Knowledge and experience with analysing and/or modelling of quantitative or qualitative data
- Comfortable self-starter and completer of assignments
- Fluent in English, both written and spoken; additional language skills (NL or other) are a plus
- Enjoy working with/in (internal/external) teams, an integral part of many of our projects
- Able to deliver value and quality to our customers and partners (verbally and written)
- Excellent communicator (in person, presentations, writing reports)
- Existing work-permit to work in NL (currently we are unable to be a visa sponsor)
- Willing and able to travel (inter)nationally with some regularity
- An analytical and curious mind with a passion for environmental technology and people
- Driving licence

We only accept applications from candidates who are either EU-citizens or already have a valid work permit.

And do you have certain additional expertise and skills that are highly valuable in the everchanging world of mobility and transport that you want to bring to our team?

CONTACT DETAILS

Do send us your CV and a letter where you motivate the above to hello@cenexgroup.nl (CC, jobs@cenex.co.uk). We look forward to hearing from you!

NOTE: We prefer potential candidates to apply directly to us over applications via recruitment agencies
