Contract:	Permanent, full-time at 37 hours/week
Salary and benefits:	To be discussed, includes holiday allowance and 27 days paid leave) and pension
Location:	Amsterdam / EU
Closing date for applications:	Open

Looking for an (new) opportunity that challenges your transport, energy, and mobility related knowledge? Would you like to sink your teeth in various mobility related technical, environmental, and social challenges, and enjoy the variety of working on (applied) research and consultancy work? Then we recommend reading on!

WHO WE ARE

At Cenex Nederland it is our mission to support our customers and partners in making the world a better place to live and travel in. As an independent not-for-profit Consultancy and Research Technology Organisation we specialise in zero emission mobility, its energy infrastructure and circular economy.

You would become part of the growing team of experts of Cenex NL. We are a relatively flat organisation, fostering a work environment where we support each other but encourage self-initiative and independence. You would be joining a not-for-profit organisation, and a team where sustainability and innovation is considered ‘business as usual’ and is fun to work with! Working hours may vary, but mostly fall between 8.30 (for early birds) and 18:00 (for afternoon thrivers). Whether this is in the office, home, or another (NL/EU) location...or even traveling elsewhere for one of your projects, there is flexibility.

In addition to our own team in the Netherlands we work closely with our strategic partner Cenex in the UK. This means we have access to an additional team of over 30 specialists with a wide range of complementing knowledge and skills to strengthen our team and ability to provide a great range of expertise to our partners and customers. Amsterdam may be our hometown, but our activities and ambitious agenda have an international reach as we often work in international projects, with customers both in and outside of the Netherlands.

YOUR ROLE

The world of mobility is changing fast. Electric and hydrogen vehicles are becoming part of the landscape, while cities and companies are also looking to combine this transition with topics such as vehicle-to-grid,

shared mobility and hubs for transporting goods and people. Should you join the team as our new colleague, you will be working on both research & demonstration projects as well as consultancy projects. Depending on your level of experience and specialism areas, your daily activities could vary from

- analysing and evaluating (technical, economic, social and environmental) performance of zero-emission vehicles (e.g., BEVs, FCEVs, light- and heavy-duty)
- analysing and evaluating (required) energy infrastructure technologies (e.g., charging and hydrogen refuelling, possibly in combination with generation and storage of energy)
- developing zero emission mobility strategies for public and private sector clients (such as local authorities and logistics fleets etc.)
- evaluating and/or contributing to the development of best practices, policy guidelines and recommendations for sustainable mobility
- engaging in dialogue with and maintain relations with clients and partners (industry parties, public sector, knowledge institutes, etc)
- Attending and presenting at (industry) conferences and organising workshops
- Writing of customer and public-facing reports and other forms of publications

YOUR PROFILE

The role of 'Specialist & Consultant – 'Zero-Emission Mobility' with Cenex NL can cover a range of specialisms at different experience levels. We are looking for people who can add value to our team from a variety of knowledge areas and skills, with *a good / broad mix of the following shared traits*:

- Relevant master's degree (such as Technology, Engineering or Business and Innovation)
- Expertise and experience in zero or low-emission transport, vehicles and/or energy infrastructure
- Knowledge and experience with analysing and/or modelling of quantitative or qualitative data
- Experience in working in projects *up to* able to responsibly manage multiple projects (including project team coordination, budget management etc.)
- A self-starter and completer
- Fluent in English, both written and spoken; additional language skills (NL or other) are a bonus
- Enjoy working with/in (internal/external) teams, an integral part of many of our projects
- Excellent communicator (in person, presentations, writing reports)
- Able to translate information (verbally and written) to deliver valuable and high-quality insights to our partners and customers
- Located in NL or (eligible to work in) another EU country, willingness to travel internationally on occasion
- An analytical and curious mind with a passion for environmental technology and people
- Driving licence

CONTACT DETAILS

Do you think you would be a good match, don't hesitate to send your **CV and a letter where you motivate your match** to hello@cenexgroup.nl (CC, jobs@cenex.co.uk). We look forward to hearing from you!

NOTE: We prefer potential candidates to apply directly to us over applications via recruitment agencies
